

SUMMARY

Experienced Software Engineer with 3+ years in full-stack development, AI integration, and cloud-based solutions. Proven track record in designing scalable applications, optimizing performance, and delivering high-quality software. Strong collaborator with experience mentoring teams and leading Agile sprints.

WORK EXPERIENCE

Community Dreams Foundation	Remote
Software Engineer	Jul 2025 – Present
– Led the development of AI-driven web applications using Spring Boot, Python, React and integrated OpenAI APIs, enabling automated content creation and actionable data insights that increased user engagement by 30%. – Designed and implemented scalable RESTful microservices architecture deployed on AWS EC2 + RDS with Docker, reducing latency and improving system reliability for multiple concurrent users. – Created and maintained real-time analytics dashboards using Python, FastAPI, and React, providing stakeholders with accurate visualization of user activity, project outcomes, and key performance metrics. – Enhanced accessibility and user experience by developing AI-based recommendation systems and NLP-driven tools for underprivileged communities, significantly expanding reach and usability. – Optimized database queries, implemented caching strategies, and improved backend performance by 25%, ensuring faster response times and high availability of critical services.	
ValueLabs	Hyderabad, India
Software Engineer	Jul 2022 – Aug 2023
– Developed and maintained Spring Boot + React microservices to support 10,000+ concurrent users, achieving a 30% reduction in latency and ensuring high system reliability under peak loads. – Designed secure REST APIs using JWT and OAuth 2.0, optimizing SQL queries and database interactions to achieve 15% higher throughput and faster data retrieval for critical business operations. – Automated CI/CD pipelines leveraging GitHub Actions, Docker, and Kubernetes, reducing release cycles by 20% and enabling faster deployment of new features and updates. – Implemented caching mechanisms with Redis, database indexing strategies, and system monitoring using Grafana + Prometheus, resulting in 99.9% uptime for production systems. – Refactored legacy modules, improved code maintainability, and mentored junior developers, establishing best practices and enhancing overall team productivity. – Recognized as Employee of the Month for outstanding performance, successfully clearing backlog and delivering high-quality features ahead of schedule.	
Optimal Health Solutions	Hyderabad, India
Software Engineer Intern	Apr 2021 – Sep 2021
– Developed secure healthcare features using the MERN stack integrated with AWS S3 for encrypted document storage, ensuring compliance with data privacy and HIPAA standards. – Built automated testing pipelines using Jest and Postman, significantly reducing manual QA efforts by 40% and speeding up the release process. – Participated in Agile sprints, contributed to daily stand-ups, sprint planning, and retrospective sessions, ensuring timely delivery of tasks and alignment with project goals. – Created detailed technical documentation for APIs, data models, and deployment processes to assist future development and onboarding of new team members.	

KEY SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Backend: Spring Boot, Hibernate, JPA, Node.js, Express, REST APIs, GraphQL, WebSockets

Frontend: React, Next.js, Bootstrap, Tailwind CSS, HTML5, CSS3

Cloud & DevOps: AWS (EC2, RDS, S3, Lambda, API Gateway), Docker, Kubernetes, GitHub Actions, Jenkins, Terraform

Databases: MySQL, PostgreSQL, Oracle SQL, MongoDB, Redis

Testing & QA: JUnit, Mockito, Selenium, Jest, Postman, TDD

Security: JWT, OAuth 2.0, HTTPS, OWASP Secure Coding Practices

Other Tools & Practices: Agile (Scrum, Kanban), Jira, Git, SOLID, Clean Code, Monitoring (Grafana, Prometheus)

EDUCATION

New York University, New York, NY
GITAM University, Hyderabad, India

M.Eng. in Computer Engineering, GPA: 3.5/4.0
B.E. in Computer Science, GPA: 8.3/10.0
