

Dinesh Sathunuri

New York, NY • +1 (929) 823-7775 • dsathunuri@gmail.com • linkedin.com/in/dinesh-sathunuri

PROFESSIONAL SUMMARY

Results-oriented **Full Stack Software Engineer** with **3+ years of experience** designing scalable web applications and integrating AI solutions. Expertise in **Java (Spring Boot)** and **Python** backends paired with responsive **React** frontends. Proven track record of optimizing system performance by 25% and reducing QA efforts by 40% through automation. M.Eng graduate from **NYU** with a focus on Cloud Computing and Enterprise Software.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, SQL, HTML5, CSS3.
- **Backend:** Spring Boot, Hibernate, JPA, Node.js, Express, REST APIs, GraphQL, Microservices.
- **Frontend:** React.js, Next.js, Redux, Bootstrap, Tailwind CSS.
- **Cloud & DevOps:** AWS (EC2, RDS, S3, Lambda), Docker, Kubernetes, Jenkins, GitHub Actions, Terraform.
- **Database:** MySQL, PostgreSQL, MongoDB, Redis, Oracle SQL.
- **AI & Tools:** OpenAI API Integration, NLP, Agile/Scrum, JIRA, Git, JUnit, Selenium, Postman.

WORK EXPERIENCE

Community Dreams Foundation

Software Engineer

Remote (USA)

Jul 2025 – Present

- Spearheaded the development of AI-driven web applications using **Spring Boot**, **Python**, and **React**, integrating OpenAI APIs to automate content creation pipelines.
- Achieved a **30% increase in user engagement** by delivering actionable data insights through custom analytics dashboards built with FastAPI and React.
- Architected scalable RESTful microservices on **AWS (EC2 + RDS)** using Docker containers, enhancing system reliability for high-concurrency user loads.
- Optimized complex database queries and implemented Redis caching, resulting in a **25% improvement in backend performance** and reduced API latency.
- Enhanced accessibility and user experience by developing AI-based recommendation systems and NLP-driven tools for underprivileged communities.

ValueLabs

Software Engineer

Hyderabad, India

Oct 2021 – Aug 2023

- Developed and maintained enterprise-grade web applications using **Java Spring Boot** and **React**, ensuring cross-browser compatibility and responsiveness across devices.
- Refactored legacy codebases to a modern microservices architecture, significantly improving code maintainability, scalability, and deployment speed.
- Collaborated efficiently with cross-functional teams (Product, Design, QA) in an Agile environment to deliver high-quality features on strict deadlines.
- Implemented rigorous unit and integration testing using **JUnit** and **Mockito**, increasing code coverage by 20% and reducing production bugs.

Optival Health Solutions

Junior Software Engineer

Hyderabad, India

Apr 2021 – Sep 2021

- Built secure healthcare features using the **MERN Stack** (MongoDB, Express, React, Node) integrated with AWS S3 for HIPAA-compliant document storage.
- Engineered automated testing pipelines with **Jest** and **Postman**, reducing manual QA efforts by **40%** and accelerating release cycles.
- Created detailed technical documentation for APIs, data models, and deployment processes to assist future development and onboarding of new team members.

EDUCATION

New York University (NYU)

Master of Engineering in Computer Engineering (GPA: 3.5/4.0)

Brooklyn, NY

May 2025

- *Relevant Coursework:* Cloud Computing, Internet Architecture, Database Systems, Machine Learning.

GITAM University

Bachelor of Engineering in Computer Science (GPA: 8.3/10.0)

Hyderabad, India

2021
